OPTIONAL ACCESSORIES

Wireless Wall Console (WB-660)

Wireless wall console provides you with the perfect solution to operate the opener with no wiring required allowing for flexible placement anywhere in the garage. You can set a timer for 3, 10 or 30 minutes to automatically close the door. The light button allows control of the light on the operator at anytime.

Wireless Safety Sensors (ID-002)

No need to run any wires for the photo eyes which results in a fast and simple installation. Sensors are precisely designed to detect any obstruction in the way of the garage door and prevent the door from closing for safety purposes.

Backup Battery (BA-200)

Provides continuous power to the garage door opener during a power outage. Don't get locked in or out of your garage during a power outage.

Wireless Keypad (KN-318)

Wireless system that provides the convenience of entry into your garage without a remote. Back-Lit keypad for night use and weather-proof cover protects the unit from the elements. Can be programmed to control up to 4 doors.

Light Bulb Module (LX-318)

Add additional lighting in your garage or any other area of your home. Automatically turns on when opener is activated or controlled from wall console. No wiring required, simply screw it into the light socket and pair with opener.

Plug-in Lamp Module (PM-318)

Plugs into any power outlet and works with any lamp to automatically turn on and provide additional lighting in the home when the opener is activated.

CarHome Button Remote (HB-318)

HB-318 is a small discreet remote button that can be placed anywhere in your vehicle that will allow you to operate the garage door easily. Long life battery and 3M self adhesive backing for easy installation. Passcode feature available for this remote.

Remote (MK-318-1/2/3)

MK-318 is a sleek and stylish key-chain-style remote that is small enough to fit in a pocket or purse. Available with one, two, or three buttons so you can control multiple garage doors with one remote. Passcode feature available for the three button remote.

Remote (MM-318-1/2/3)

MM-318 is a compact key-chain-style remote that is small enough to fit in a pocket or purse. Available with one, two, or three buttons so you can control multiple garage doors with one remote. Passcode feature available for the three button remote.

100% Installation Kit

This kit allows you to install the SMO to your garage door if the space is not wide enough to fit the unit for standard installation.
